To search for specific names, type keywords into the search bar in your PDF reader. If a keyword search doesn't turn up expected results, we recommend that you also scroll down into the alphabetical listings to search for the name, as the font-reading software is not perfect.

The table of contents below can also give you an idea of where to look within the document for other kinds of information listed in the directory, like street guides, government listings, and advertisement indices. Note that the PDF page number and the original directory page numbers are different, because the color-printed advertisement pages in the directories were not numbered.

Table of Contents:

DRAKE'S

PATENT

ARTIFICIAL

LIMBS,

No. 326 FULTON STREET,

BROOKLYN.

DRAKE'S

PATENT ARTIFICIAL

HANDS, LEGS & ARMS,

&c., &c.

These artificial Limbs are a decided improvement over all others, and have received the First Premiums, as follows: Silver Medal and Diploma at the Massachusetts Charitable Mechanic Institute, Boston, 1856; Silver Medal, Washington City, 1857; Silver Medal and Diploma, Lowell, Mass., 1857; Silver Medal and Diploma, Charleston, S. C., 1857; Gold Medal, Baltimore, Maryland, 1857; also Medals and Diplomas at every other exhibition where they have been presented for examination in competition with all others.

The Leg is constructed upon an entirely new principle, and so fitted as to be worn with perfect ease; can be applied to the shortest or most imperfect stump, and immediately used. A large number are in use, and in many cases other so-called premium legs have been laid aside, and these substituted, to the great comfort and satisfaction of the wearers. The Hand and Arm present a perfectly natural appearance, and are the only ones of any practical utility. Parts of Hands can be furnished, as well as the entire Hand. With it the wearer is enabled to write with ease, to dress and undress the person, to handle the knife and fork, to feed themselves, and perform most of the necessary acts of a natural limb.

JOHN S. DRAKE, Surgeon Artist,

316 FULTON STREET, Brooklyn.

DEFORMED LIMBS.

My apparatus for Paralyzed and other Deformed Limbs, are constructed on an entirely new principle, so as to have a more natural appearance, as well as being a greater support to the wearer, than the old arrangement for such cases. These supporters are made to suit all kinds of Deformed Limbs. They are so constructed as to hide the deformity, with all the apparatus out of sight, so that the wearer can walk with ease and naturalness of action; and in almost all cases where the patient is vigorous, they will be brought to the natural use of the limbs, and the deformity will be removed.

PREFACE.

The canvass for this year's Brooklyn Directory, has shown a very different result from that obtained last year.

The canvass last year took place while the Draft was going on, while this year we have not had that difficulty to contend with; and therefore have had but few refusals from parties for information.

We have to announce to the public that this year's publication contains over one hundred pages (which is over ten thousand names) more than last year's issue, and about seven thousand more than the year 1863-4.

This is accounted for from the fact that the city contains many more inhabitants than it did a year ago, and on account of there being comparitively but few refusals, as stated above.

In cases of streets having been re-numbered before the canvass, the new numbers have been taken in all cases where they could be obtained.

The much needed reform of re-naming the streets has been taken in hand by our City Authorities, and as soon as they shall have completed their arduous labors, we shall, without delay, revise our Street and Avenue Directory.

The publishers confidently believe that this year's issue will be found more correct in every particular, than any Directory before published in Brooklyn, as no labor or expense has been spared to produce this much desired result.

On account of the increased amount of matter contained in the present publication, as well as the continued high price of all publishing materials, the cost has been very much increased, but the price of the work will continue the same as last year.

Steam Pump Works,

CAMPBELL & HARDICK BROS.,

No. 9 Adams Street Brooklyn, N. Y.

SOLE MANUFACTURERS AND PROPRIETORS OF

HARDICK'S PATENT

DOUBLE-ACTING STEAM PUMP

AND

FIRE ENGINE.

This Pump combines all the advantages of other styles of Pumps now in the market, with none of their defects. The Patent Steam-Valve applied to this Pump enables it to start at any point of stroke by simply opening the Valve in the Steam Pipe, and the Pump is sure to start at once without the use of a starting-bar, or the annoyance of pulling a fly-wheel around to get it off the centre. For Mining purposes this Pump is peculiarly adopted, as the Valves can be removed by unscrewing one nut, and the Valve-Chest cleaned in a few minutes. As the Pump is simple in its whole construction, it does not require the neighborhood of a machine shop to keep it in working order. The Valve-Chest and Valves are made of brass or composition, and can be easily repaired or replaced when worn out. Any carpenter can make in a few minutes, of some heavy wood, a set of Valves for this Pump, if the original ones should give out. As a Boiler Feeder it has no superior, as it can be made to run at any speed, either slow or fast, to suit the work it has to perform. The undersigned respectfully solicit the attention of their numerous customers and the public in general to the merits of this Pump and desire those wishing such an article to call and examine for themselves.

421 Broome street, Second Block East of Broadway, New York City.

A FEW SUGGESTIONS TO ALL WHO WEAR GLASSES.

The question is often asked me, why it is I am so much in favor of the PEBBLE for those who wear spectacles, and what are their peculiar advantages?

I am also often asked, why ladies' eyes are more often affected than gentlemen's of the same age?

In answering these questions, I shall appeal to your own judgment and observation, leaving you to decide whether I am right in what I may say or not.

In reference to the ladies, how many there are that in reading or sewing in the evening, find their eyes are beginning to fail them, and without thinking of the consequences, take up their parents' (or some older person's) glasses and use them. Their sight is so much improved they continue the practice, and before they are aware of it they have done great injury to their eyes, and in a way they had not thought of.

Another great cause of injury to the ladies' eyes is the almost constant use of veils, when in the street, that must of necessity affect the vision, and the thicker the veil the more injurious to the eye.

Again, in buying your glasses you go to one whose whole design is to sell without any reference to your benefit, and whether the glasses you buy will injure or improve the vision is a matter of little moment to the one who sells them. This I find to be almost a daily occurrence, by my changing glasses for those who have been wearing them entirely unsuitable to their eyes.

Many think that by not wearing spectacles the eyes will improve. This is a very great error, for the longer you put off wearing glasses, when you really need them, the greater the injury to the eye. There are too many who defer the use of them till at last they are obliged to use glasses of 10 or 12 inch focus, instead of 36 or 40, which would otherwise have suited them, thus preferring a real evil to one that is imaginary.

It is generally supposed that persons wear glasses according to their age. This is erroneous, as, for instance, a child of 10 years may wear glasses as old as a person of 50, and again, a person of 50 may not need any. The shape of the eye, and not the age, is to be treated. Any one by observation will see that such is the case.

Should you examine a person's eyes that is near-sighted, they will be found to be full and round, and the more near-sighted they are the more will the eye protrude from the socket. Such require a concave lens (that is thin in the centre and thick at the edge). Again, the eyes that are weak will be flat, and require a convex lens (thick in the centre and thin at the edge), and the greater the difference in the eye the same with the glasses.

In reference to the superiority of the PEBBLE over the ordinary glass, I will say that the PEBBLE is a crystal found in the earth, and, like the diamond, ruby, emerald and other precious stones, is found in the rough state (we have specimens), and requires to be cut, ground and polished to different focus or lens to suit all ages and eyes.

Some of the peculiar and great advantages of the PEBBLE are—1st. They are pure white. 2d. Cold, and therefore cooling to the eye. 3d. Will not scratch, as they are hard like the diamond, and being so hard, takes a brilliant polish and keeps it perfect for many years.

Those who are wearing the ordinary glasses used in spectacles often have their eyes very painful, with a peculiar burning sensation, and are not able to tell the cause, or where to look for relief. So much are they troubled that very often their work or book has to be put one side to give their eyes rest; but in using the PEBBLE this does not occur, for while the glass is heating to the eye the PEBBLE, being a stone keeps the eye cool and comfortable.

Another great advantage in the PEBBLE is its extreme hardness, for, while glass becomes marred and full of scratches, so that in a short time it is not fit to use, the PEBBLE is just as perfect after twenty years' constant use as when first put in the spectacles.

We all know that an imitation diamond can be made almost as handsome as the genuine, and, while new, looks beautiful, and, would it always keep the same, but few diamonds comparatively would be used; but in a short time it loses its brilliancy and becomes worthless; it is on account of its being soft and porous. The same difference exists between the PEBBLE and glasses generally used in spectacles, thus showing to any one that will exercise their own judgment that the PEBBLE must be far better for the eye than the ordinary glass, and that the eye will be far more likely to do you good service if you follow these suggestions, than it will if you neglect them, and do as thousands have done heretofore, and find ere they are aware, they have given their eyes irreparable injury.

For myself I have used the PEBBLE for more than twenty years, and they are just as perfect now as when inserted in the frames.

The eye is too delicate to be trifled with, and you cannot exercise too much care in its protection; for if even one eye is affected, the sympathy is so strong between the two that the other must feel the injury. Such has been my observation and experience, and I have had a good opportunity for so doing, as I have been selling spectacles, and wearing them for more than 35 years.

It is the united testimony of every one that has used the PEBBLE; they would not go back to the ordinary glass, even if they could have them for the asking, considering that the safety and protection of the eye is of far more consequence than it is to save in the purchase of ordinary glass, and thus injure the eye.

General Rules for the Choice of Spectacles.

The most general and perhaps the best rule that can be given to those that are in want of assistance from glasses, in order to choose their spectacles that may suit the state of their eyes, is to prefer those that show objects nearest their natural size; neither enlarging or diminishing; not straining the eye, nor causing any unnatural exertion of the pupil.

If the PEBBLES suit the eye, it will have ease and rest; should they fatigue the eye, you had better change immediately and get those that are perfectly easy.

An attentive consideration of the following rules will enable every one to judge for themselves when their sight may be assisted and preserved by the use of spectacles.

1st. When we are obliged to remove small objects to a considerable distance from the eye in order to see distinctly. 2d. If we find it necessary to get more light than formerly, as, for instance, to place the work or book much nearer the light. 3d If on looking at and attentively observing a near object it becomes confused, and appears to have a mist before it, or the letters of a book run into each other and appear double. 4th. If the eyes are so fatigued by a little exercise that we are obliged to shut them from time to time, and relieve them by looking at different objects.

When any of all these occur, the sooner you get a pair of BRAZILIAN PEBBLE SPECTACLES for the eyes, the more you will enjoy life and have the satisfaction of having good eyesight for many years longer.

These considerations point out clearly the advantages that may be obtained by a proper choice of spectacles on first wearing them, and the importance of making such a choice; and again, where is the best place to buy just the article, and where every pair is warranted to give perfect satisfaction.

We have been selling the PEBBLE for many years, and in no instance where a person has worn them would they be willing to give them up on any account, as they are really invaluable, and no other kind should be used by any one who values their eyesight.

Many persons do not require glasses to see at a distance, though they may use them to read or sew. To all such we recommend the PANTOSCOPIC PEBBLE, as possessing great advantages in this respect, by leaving a clear vision above the glass when not using them, and by casting down the eye the full benefit of glasses is derived. To the *clergy* who wish to refer to their manuscript, and at the same time have a clear and unobstructed view of the most distant part of the place of worship, they are especially adapted.

Or the *lawyer*, who frequently has to advert to his notes, and is desirous at the same time to see around him, they are equally serviceable.

Our PEBBLE test is a philosophical curiosity, as showing the difference between the PEBBLE and the ordinary glasses generally used. We invite all to call and examine it, and the most skeptical can clearly see that the PEBBLE is the best and most perfect article ever made for the preservation of the eye, and for giving ease and comfort in reading or sewing, and those who do not use them will always regret it.

We say with perfect confidence, that every pair gives entire satisfaction and gratification to all who have used them, and they invariably say to their friends get the PEBBLE in preference to all other glasses.

We have a very large assortment on hand, and are constantly importing, so that we can suit every one either in Spectacles or Eye-Glasses, of gold, silver, steel, shell, rubber, or horn, and my personal attention is given at all times to the fitting and adjusting of all kinds of glasses to the eyes.

GOETZ & CO.,

EW IMPROVED PIANO FORTES.

By a simple improvement we add much to the sweetness, richness and beauty of tone which have heretofore distinguished our instruments. The full heavy Bass, the singing quality and the brilliancy of the Treble have called forth the most flattering testimonials of approval from some of our most eminent Artists, and from a host of competent judges. We are also awarded

THE HIGHEST PREMIUM

in competition with the best makers in the country. We need hardly add, that in reference to neatness and finish of workmanship, as well as to durability, this new Piano Forte comes up to that standard of excellence which our instruments have always occupied.

F. C. LIGHTE & CO., MANUFACTURERS OF FIRST CLASS PIANOFORTES,
421 Broome street, Second Block East of Broadway, New York City.

GRATES, FENDERS,
AND
FIREPLACE HEATERS.

W. JACKSON & SON,

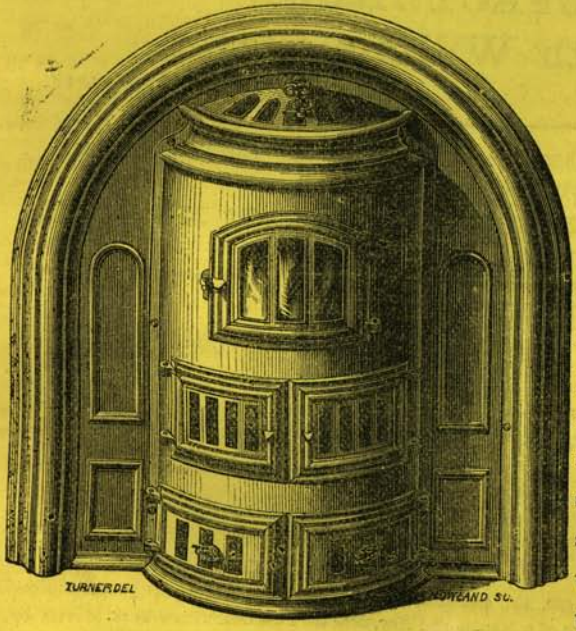

UNION HEATER.

Late of the well-known firm of W. & N. JACKSON & SONS,

Manufacturers and Dealers in every variety of

PARLOR GRATES,
FENDERS,
AND
FIREPLACE HEATERS,

246 Front Street,
Near Peck Slip, and
930 BROADWAY,
Between 21st and 22d Sts.,
NEW YORK.

This cut represents a Heater to set in the fireplace, designed for heating the basement, parlor, and second story. It occupies no more room than an ordinary grate. Its superiority over others is manifested by its flues being so constructed as to prevent choking. The air is received either from basement or cellar, and in passing through the various flues acquires a genial warmth, which is diffused throughout the rooms at pleasure.

THE MASON & HAMLIN

CABINET ORGANS

IN CASES OF

Rosewood, Carved Rosewood, Ebony, engraved and gilt ; Plain Black Walnut, Carved Black Walnut, Dappled Walnut, Plain Oak, Carved Oak, &c.

These instruments are evidently destined to become as fashionable for private use, and even more extensively used than the piano-forte. Their capacity for both secular and sacred music, the purity and richness of their tones, the great variety of which they are capable and their elegance as pieces of furniture are securing their rapid introduction in the drawing rooms of the best musical circles, while the low prices at which some of the styles in plain cases are afforded adapt them to the widest use.

THE CABINET ORGAN bears the same relation to the harmonium or melodeon which the modern piano-forte bears to the *spinnet* of olden times. Its volume and beauty of tone, and the artistic effects of which it is capable, have attracted to it an amount and degree of attention and favor from musical connoisseurs which have not before been given to any instrument of this class.

Among those who have publicly recognized the sterling qualities of the MASON & HAMLIN CABINET ORGANS and who pronounce them SUPERIOR TO EVERY OTHER INSTRUMENT of their class in the world, are a large portion of the most eminent organists, pianists and musicians in the country.

"It is the universal opinion of the musical profession," says *The New York Tribune*, "that Messrs Mason & Hamlin have succeeded in making a better small instrument than any other of the organ kind, that no such mechanical work of the kind can be found in Europe.

"These instruments represent the highest accomplishments of industry in this department," says *The Boston Advertiser*, adding, "this is not only our opinion, but the *unanimous* verdict of the organists."

"It is," writes Dr. Prime of *The New York Observer*, "a glorious instrument for the temple of service, so readily secured as to be available for any congregation, and so effective as to meet the services of the most refined and fastidious."

Mr. Gottschalk, the celebrated pianist, declares it "worthy the high praise it has received, and sure to find its way into every household of taste and refinement which can possibly afford its moderate expense."

The manufacturers respectfully invite musical professors and amateurs to examine these instruments and form their own judgment respecting them. Those who are not cognizant of the progress which M. and H. have recently made in this class of instruments, cannot but be interested in such an examination, especially of the larger styles of Cabinet Organs ; and those who have been prejudiced against all such instruments, will be likely to have such prejudices removed.

Among those who have kindly expressed their high appreciation of the MASON & HAMLIN CABINET ORGANS, and publicly declared them the best instruments of their class in the world, are such well known organists and artists of New York City as BERGE, BRAUN, CUTLER, DAVIS, EISFELD, FRADEL, GOLDBECK, GOTTSCHALK, MAGRATH, WILLIAM MASON, MARETZEK, MILLS, MOSENTHAL, MORGAN, SANDERSON, SMITZ, STOEPEL, STRAKOSCH, THOMAS, TIMM, WELS, WOLFSOHN, ZUNDEL, together with hundreds of others in other principal cities, including a large portion of the most distinguished musicians of the whole country.

CAUTION TO PURCHASERS.—The MASON & HAMLIN CABINET ORGANS derive their superiority not alone from greater excellence of material and workmanship, but also in a measure from the employment of peculiarities of construction which, being patented, cannot be used by other makers. Every instrument made by M. and H. bears upon its name-board the words, in full, "MASON & HAMLIN CABINET ORGAN."

Circulars with full particulars, and list of styles and prices (which vary from $110 to $1,200 each) sent free. Warerooms in New York removed to the new marble building, No. 596 Broadway, two doors above the Metropolitan Hotel.

F. C. LIGHTE & CO., MANUFACTURERS OF FIRST CLASS PIANOFORTES,
421 Broome street, Second Block East of Broadway, New York City.

PURELY MUTUAL LIFE INSURANCE.

NEW-YORK LIFE INSURANCE CO.

ESTABLISHED 1845.

Home Office, 112 & 114 Broadway, N. Y.

ASSETS, (SECURELY INVESTED,) $4,000,000.

☞ A Policy of Life Insurance is always an evidence of prudent forethought, and no man with a dependent family is free from reproach if his life is not insured.—*The late Lord Lyndhurst*, Chancellor of England.

☞ There is nothing in the Commercial world which approaches, even remotely, to the SECURITY of a well established and prudently managed Life Insurance Company.—*DeMorgan.*

This is one of the OLDEST, SAFEST, and most SUCCESSFUL Life Insurance Companies in the United States and offers advantages *not excelled*, and, in some respects, NOT EQUALLED, by any other. It has paid to widows and orphans of the assured over TWO MILLION DOLLARS. Its Trustees in New-York City are of the very first and most reliable names.

It is STRICTLY MUTUAL, the policy holders receiving the entire profits.

☞ Special care in the selection of its risks,—strict economy,—and a safe and judicious investment of its funds,—emphatically characterize the management of this Company. ☜

Premiums received QUARTERLY, SEMI-ANNUALLY or ANNUALLY, at the option of the assured. Policies issued in all the various forms, of WHOLE LIFE, SHORT TERM, ENDOWMENT, ANNUITY, &c

DIVIDENDS DECLARED ANNUALLY, (FOR 1865, 50 PER CENT.)

The mortality among its members has been *proportionately less* than that of any other Life Insurance Company in America—a result consequent on a most careful and judicious selection of lives, and one of great importance to policy holders.

It offers to the assured *the most abundant security in a large accumulated fund, amounting now to*

FOUR MILLION DOLLARS.

It accommodates its members in the settlement of their premiums, by receiving a note for a part of the amount when desired—thus furnishing Insurance for *nearly double the amount* for about the SAME CASH PAYMENT, as is required in an "all cash Company."

The **NEW FEATURE** in Life Assurance, recently introduced by this Company of issuing

LIFE POLICIES NOT SUBJECT TO FORFEITURE,

is regarded with universal favor, and annihilates the only argument of any weight which can possibly be brought against the system of Life Insurance.

FRANCIS HART & CO., Printers and Stationers, 63 Cortlandt St., New-York.

Dividends declared upon the ordinary Life Table Rate. If the premiums of a Non-Forfeiture Policy are paid all cash, the Dividends operate as an Annuity to the party during his whole life.

The following is a summary of the Company's business for the year 1864:

4,905 New Policies Issued, Insuring $13,147,558

Income from Premiums and Interest . . . $1,729,811 17

Disbursements for Losses, Dividends and Expenses . 724,593 04

Balance in favor of Policy Holders, who are the ONLY STOCKHOLDERS IN THE COMPANY, and receive ALL THE PROFITS

OVER ONE MILLION DOLLARS.

Dividend declared January 1865, Fifty per Cent.

The following statement, taken from the OFFICIAL RETURNS of the Massachusetts Insurance Commissioners, showing the number of policies issued in the years 1861, 1862, and 1863, exhibits at a glance THE PRESENT COMPARATIVE SUCCESS of the principal Life Insurance Companies in this country:

From the above it will be seen that the number of policies issued in 1861, 1862, and 1863, by the "New York Life," exceeded that of any other Company in the United States. Much of this success is due to the NON-FORFEITING PLAN originated by this Company, which has revolutionized the system of Life Insurance, throughout the United States, and is more fully described on the next page.

The New-York Life Insurance Company

Has originated and adopted a NEW FEATURE, known as

THE NON-FORFEITURE PLAN,

Which is rapidly superseding the old system of life-long payments. It has received the unqualified approval of the best business men in the land, large numbers of whom have taken out policies under it, purely as an investment.

A new schedule of rates has been adopted, under which the insurer may *cease paying at any time without forfeiture of past payments*, and

AT THE END OF TEN YEARS ALL PAYMENTS CEASE ENTIRELY,

and the policy thenceforward becomes a *source of income* to him. To secure this result the annual rate of insurance must of course be somewhat higher. But almost any person in active business would greatly prefer paying a higher rate for a *limited time and be done with it*, to incurring a life-long obligation, however small.

By the table on which this class of policies is based, a person incurs no risk in taking out a policy. Insuring to-day for $5,000, if he dies to-morrow the $5,000 immediately becomes a claim; and if he lives ten years, and makes ten annual payments, his policy is paid up—nothing more to pay, and still his dividends CONTINUE, making

HIS LIFE POLICY
A SOURCE OF INCOME TO HIM WHILE LIVING.

The only argument of weight offered against Life Insurance is, that a party might pay in for a number of years, and then, by inadvertence, inability, &c., not be able to continue paying, thereby losing all he had paid. The "New York Life" have obviated this objection by their

TEN YEAR NON-FORFEITURE PLAN.

A party by this table, after the second year

CANNOT FORFEIT ANY PART OF WHAT HAS BEEN PAID IN.

Thus, if one insuring by this plan for $10,000, discontinues after the second year, he is entitled to A PAID-UP POLICY, according to the number of years paid in, viz.:

Second year, two-tenths of	$10,000	(am't ins'd),	amounting to	$2,000,	with	divid'd	on same	for life.
Third year, three-tenths of	"	"	"	3,000,	"	"	"	"
Fourth year, four-tenths of	"	"	"	4,000,	"	"	"	"
Fifth year, five-tenths of	"	"	"	5,000,	"	"	"	"

And so on, until the tenth annual payment, WHEN ALL IS PAID, and DIVIDENDS STILL CONTINUE DURING THE LIFE-TIME OF THE ASSURED.

☞ This feature, among others, has given to this Company a success unparalleled in the history of Life Insurance.

A credit of twenty per cent is given on this table if desired. The current New York rate of interest upon these credits is required to be paid annually until they are cancelled by dividends, or paid off by the assured.

[REV. HENRY WARD BEECHER'S PAPER.]

NEW-YORK LIFE INSURANCE COMPANY.

"We have much pleasure in calling attention to the Annual Statement for 1864 of the above Company, which will be found in another column. It is in all points most satisfactory. They declare a Dividend to Policy-Holders for the past year of Fifty per cent. They have augmented their Capital One Million of Dollars, and it now reaches nearly $4,000,000; they have issued 4,905 new Polices during the year, insuring $13,147,558. Its Cash Premiums exceed those of any other Company in the United States, with but one exception. The whole business of this Company reflects great credit on its prudent and energetic management. Its Board of Trustees is composed of Influential Citizens of New-York, whose names and standing are a guarantee to the public of the solid character of this wealthy Company. It is the religious duty of the head of every family to protect it from all contingencies, by having a Life Insurance; and we know of no Company by which the interests of the Policy-Holders are better cared for than in the New-York Life Insurance Company, which now makes its 20th Annual Report."

The lively prosperity and success of this Company is shown in the fact, that for the last three years it has taken the lead of ALL the Life Insurance Companies in this country; the Official Returns of the Massachusetts Insurance Commissioners showing that the amount of its new business for the year 1862, nearly equalled the combined business of any other two Companies in the United States. ONE OF THE INSTITUTIONS OF BROOKLYN IS

JORDAN'S

CARPET  CLEANING

ESTABLISHMENT,

75 Wyckoff Street,

Where you can have your Carpets thoroughly cleaned at ALL SEASONS of the year, OLD Carpets are made to look nearly as good as NEW by

JORDAN'S PATENT

CARPET BEATING AND BRUSHING MACHINE,

Which is acknowledged by all to be the best and most perfect Machine yet invented; because the DUST and MOTH are all removed without STRAINING the Carpet, and has Brushes attached, while no other Machine in Kings County has.

P. S.—State or county rights for Jordan's Machines for sale by

T. JORDAN, 75 Wyckoff Street, Brooklyn.

Or, W. H. JORDAN, 144 Bank Street, New York.

MME. MORROW,

Corset & Dress Making

ESTABLISHMENT,

273 FULTON STREET,

(One door above Tillary Street.)

A large assortment of ***French Corsets,*** both Embroidered and Plain, that cannot be equaled in the City, to meet the demands of her numerous patrons. An assortment of her own manufacture, of a superior shape, and warranted to fit the most difficult figure, giving them a style and shape that cannot be acquired by any other corset, and yet MME. MORROW sells them low enough that all classes may wear her perfectly fitting corsets.

She also sells a superior **HOOP SKIRT,** at a low figure, and has added still more to her stock, a line of **HOSIERY,** that ladies and gentlemen would do well to examine before purchasing elsewhere.

FRENCH DRESS MAKING, as usual, MME. MORROW superintending the fitting personally. Dresses Cut and Fitted. Marking for Braiding and Embroidery.

☞ Remember the number, **273 FULTON STREET,** (occupying the store and house for business,) one door above Tillary Street, **BROOKLYN.**

STREET AND AVENUE DIRECTORY

OF THE

(CONSOLIDATED)

CITY OF BROOKLYN.

SHOWING the position, commencement, and termination of each Street, Avenue, Place, Lane, Court, Alley, etc., in the Consolidated City, with the junctions and crossings of the intersecting streets; also, the number of the building at the corner of the street, avenue, etc., where there is any.

When there is no house on the corner, or where the corner house fronts on the crossing street, the number nearest the corner is given, and a * placed before it, to denote that that number is not to be looked for on the corner of the street or avenue named.

A — denotes that there is no number on the corner, or near the corner.

A † placed in the right or left column denotes that the street does not extend to that side of the one under whose heading it is found.

As a rule, the numbers will be found to commence westward, and northward from the opening of the street or avenue, the *even* numbers occurring generally on the *right hand* side.

EXPLANATIONS.

If you wish to find the location of any number—for instance, 115 Bridge Street—on consulting the Directory you will observe that 105 Bridge is on the left hand of that street, and on the corner of Prospect, and 129 Bridge is on the left hand corner of Sands; hence, the desired location of 115 Bridge is between Prospect and Sands, on the left hand side.

The capitals E. D., when placed after a street, avenue, etc., denote that it is in the Eastern District. As there are several streets in Greenpoint, Bushwick, and Williamsburgh of the same name, and all being reckoned as the Eastern District, the exact location of such streets is given in connection with the capitals E. D.

Note.—As there are two Hudson Avenues in the Western District—one running from East River, between Gold Street and the Navy Yard, south to 208 Fulton Avenue, the other from Fulton Avenue, between Brooklyn Avenue and Albany Avenue, south to City Line (Flatbush)—the latter will be designated through the body of this work by *Italics*.
